

Pwn & Patch

Your *cyber security partner*

Data Breaches

9 months

Average time a breach remains undetected

\$4.5 M

Cost of a Cyber breach

24 hours

Are enough for a hacker to get full control over the company Infrastructure.

*Source IBM Data Breach 2023 report

Initial attack vector used by hackers

Hacked Passwords

Hackers taking advantage of known credentials used inside the targeted company.

Exposed Vulnerable assets

The company is unable to know and secure their attack surface.

Most organizations are not aware of their compromised credentials and exposed information. If **they are aware** they may be using manual techniques and very long process.

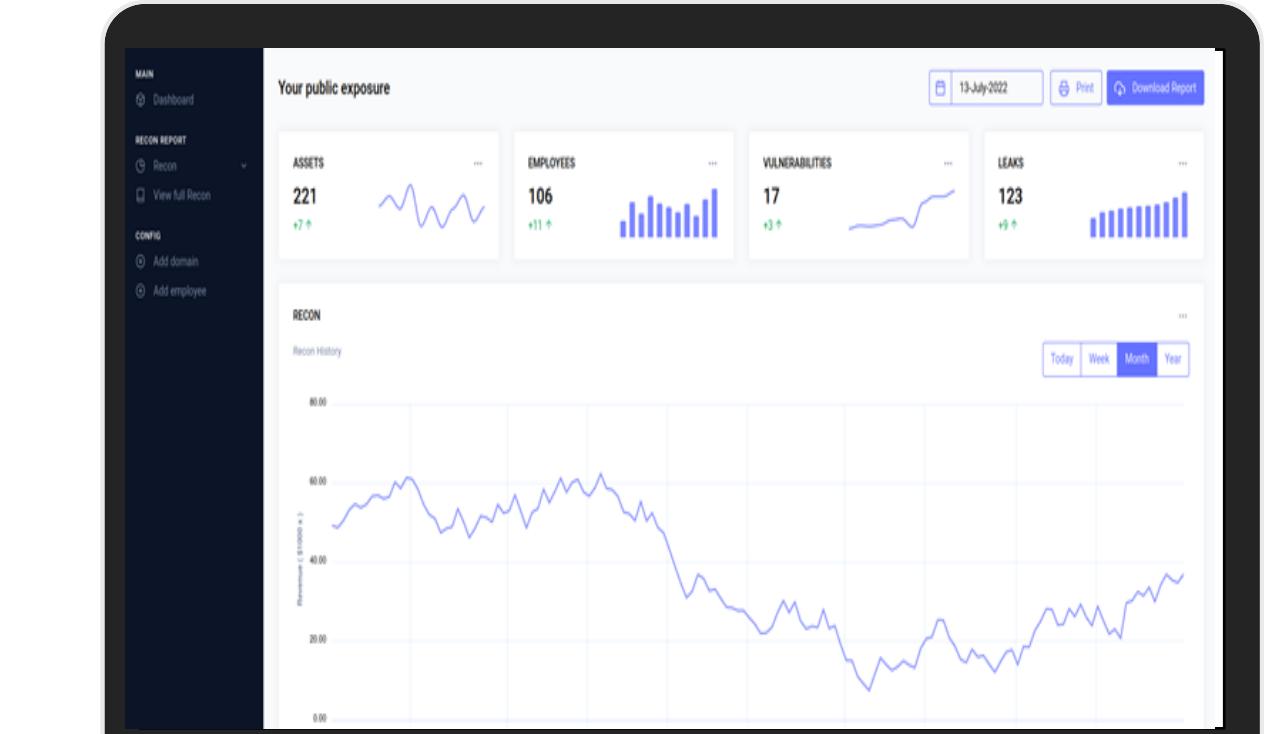

The solution

Oktoboot

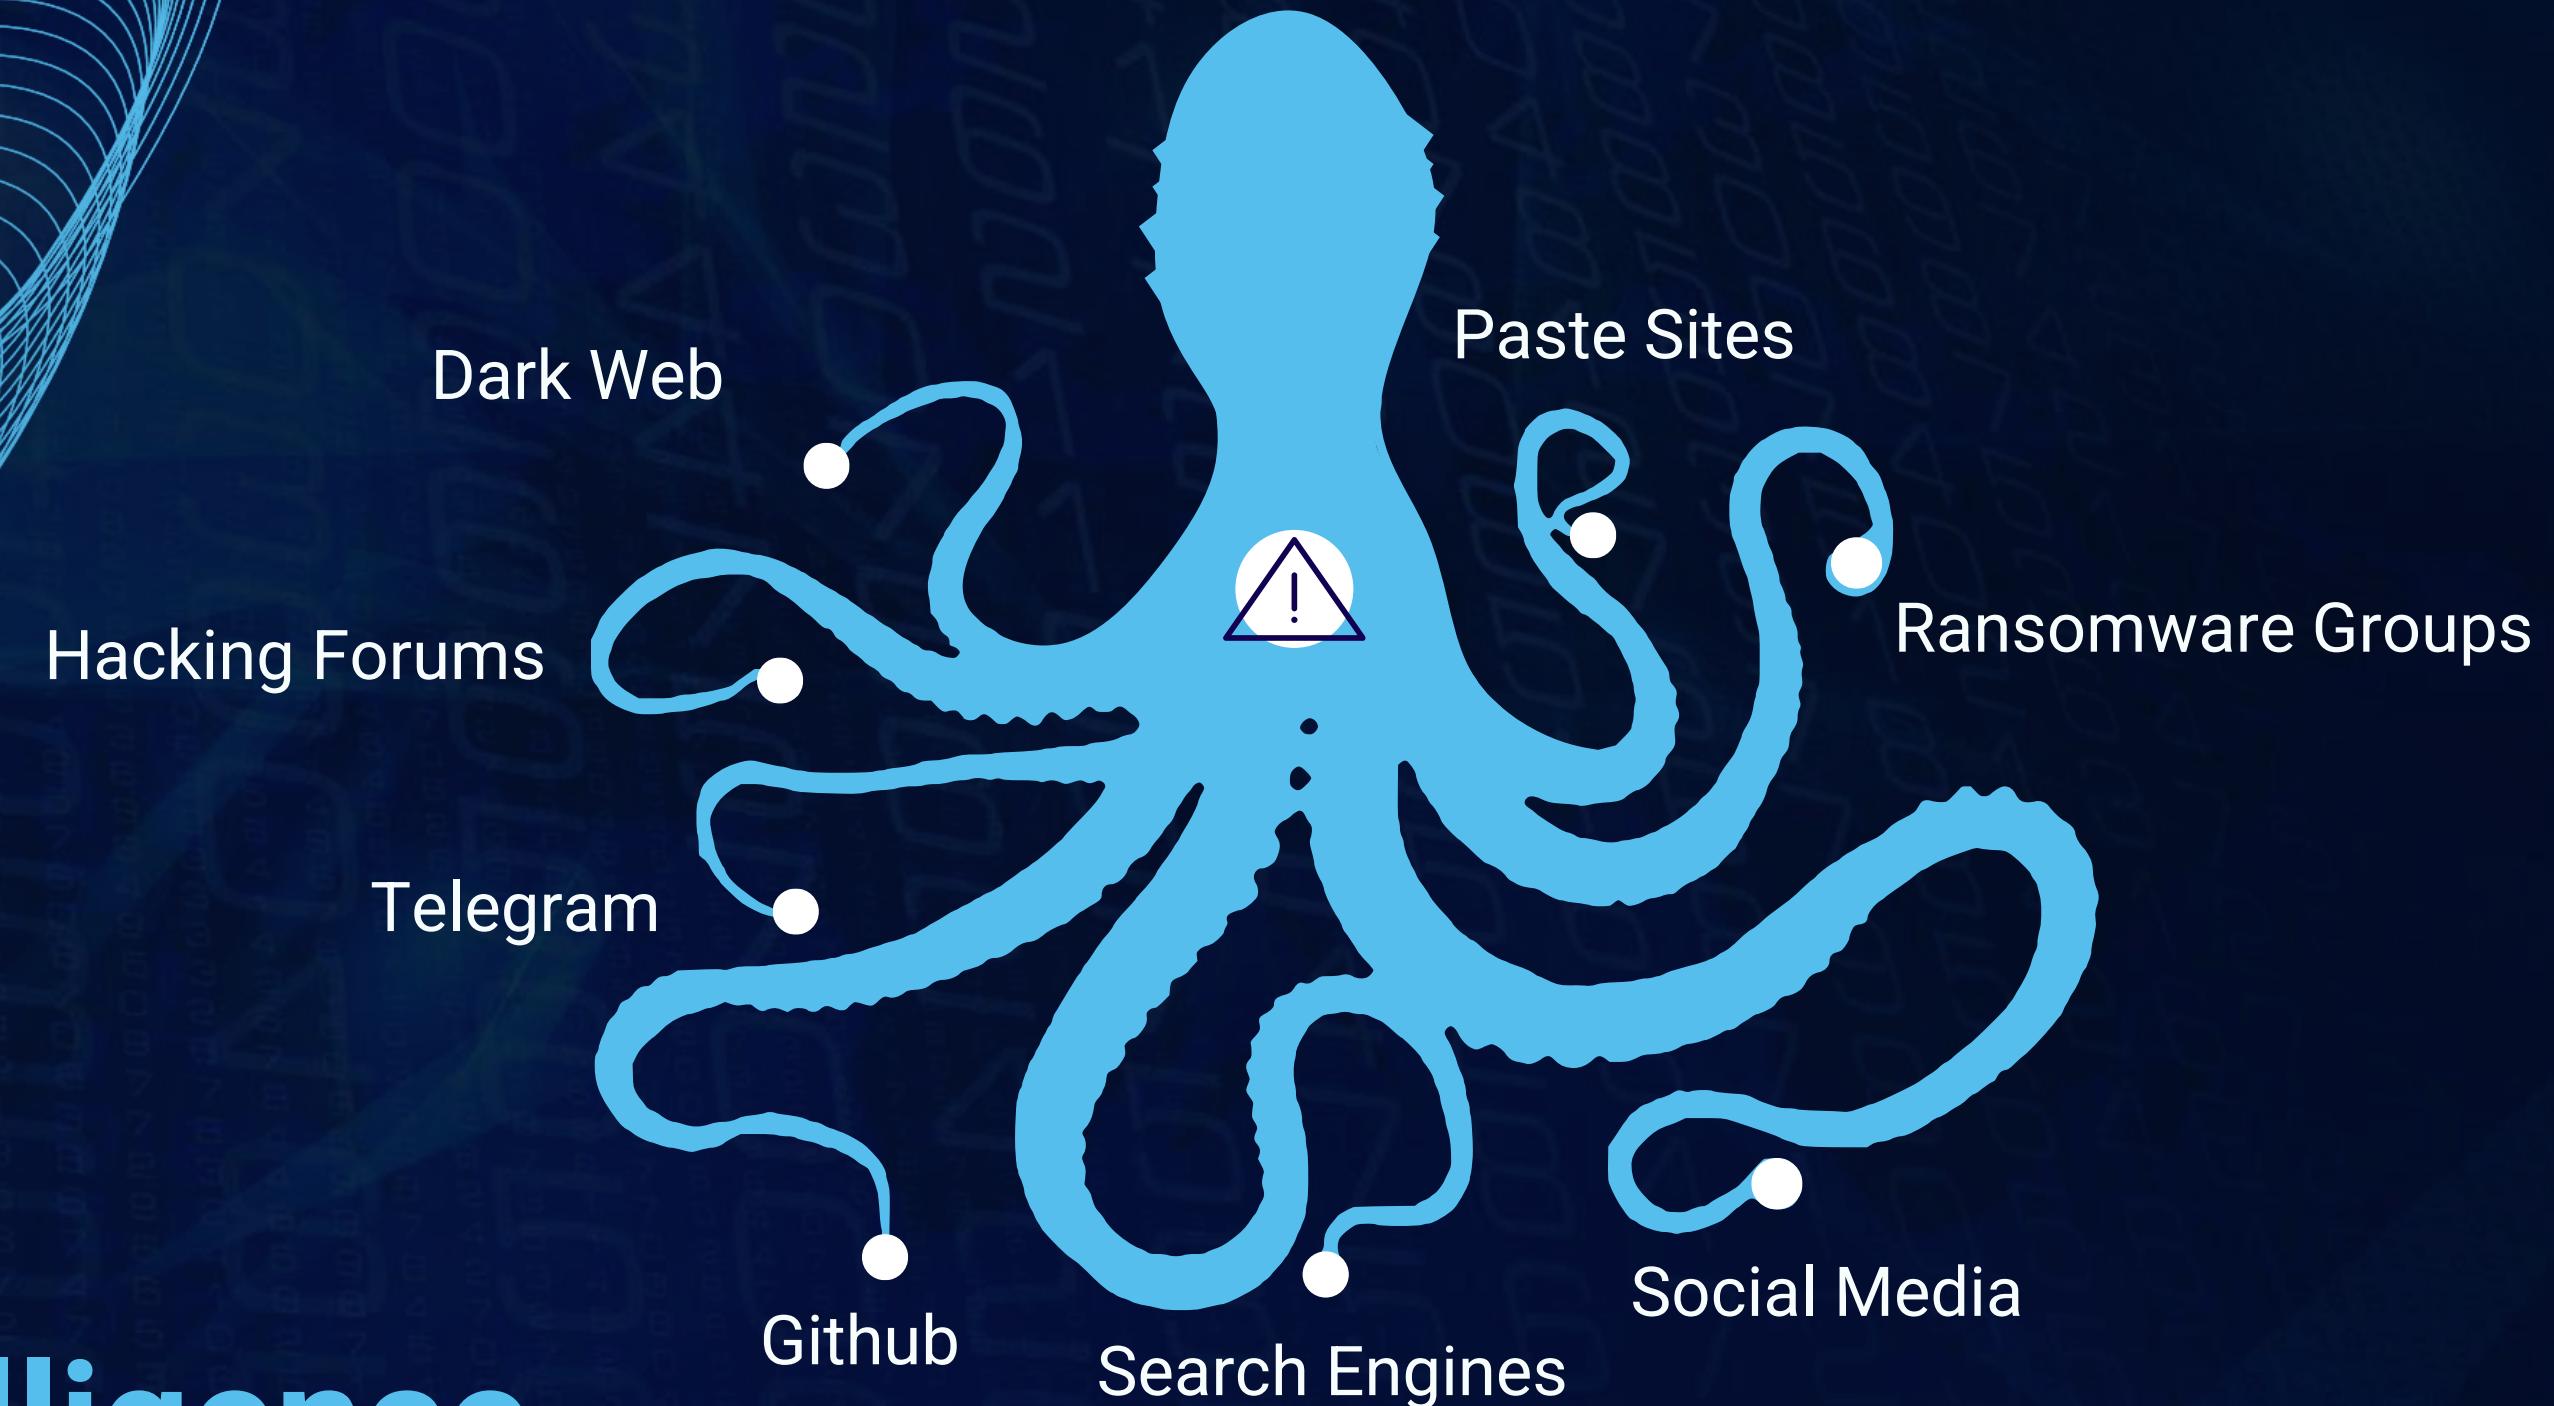

Threat Intelligence Platform

Allow our clients to **receive alerts** about any **data breach** our platform detects in Dark Web.

Threat Intelligence

Allow our clients to receive alerts about any data breach our platform detects in Dark Web/Deep Web and many other resources.

Oktoboot

A Dark web monitoring tool that allows our clients to look for their **sensitive information** or **leaked business credentials** in the dark web.

1

Passwords

Detect Leaked Passwords in Real Time

3

Secrets

Exposed in source code or cloud buckets

2

Documents

Scan internet for public sensitive documents leaked

4

Vulnerabilities

Discover vulnerabilities in your exposed assets
